Assistly

AI WHATSAPP RECEPTIONIST FOR YOUR BUSINESS

Drowning in WhatsApp messages?

Turn Your Business WhatsApp Into a 24/7 Smart Assistant

Assistly answers your customers, books appointments with the right staff member and shares your offers — and hands the chat to you whenever a human is needed. Your customers just keep using WhatsApp.

- ✓ 7 Days Free
- ✓ Setup Included
- ✓ 24/7 Active
- ✓ Human Handoff

How It Works

1 Customer Messages You

Your customer sends a WhatsApp message to your existing number to ask a question or request an appointment. No app download needed.

2 AI Replies Instantly

Assistly AI understands the message, checks availability, and replies in seconds. Automatically.

3 Appointment Booked

The appointment appears in your calendar and you get an instant notification. The customer is sent an automatic reminder before their appointment, at the time you set.

Who Is It For?

Any service business that communicates with customers on WhatsApp.

- Clinics
- Car workshops
- Barbers
- Beauty salons
- Hotels & Accommodation
- Restaurants & Cafés
- And many more…

Built on Meta's Official WhatsApp Business API

Some tools connect via QR code scan — the unofficial route that WhatsApp actively detects and bans. Assistly runs on Meta's verified Business API: fully compliant with WhatsApp's policies.

Core Features

Smart AI Replies
Understands customer questions in context and replies in natural, human-like language — instantly, at any hour.

Full Appointment Control
Set working days, hours and service durations, block a day or a slot in one click, and add phone bookings manually — every appointment in one place.

Staff & Resources
Add staff members or bookable resources, choose which services each one provides and set their availability — with simultaneous bookings when several are free.

Customer Picks — or Auto-Assign
Let customers choose their preferred staff member on WhatsApp, or let Assistly assign one automatically: random or least-busy.

Offers & Promotions
Create offers for all services or a specific one, with start and end dates — the assistant mentions relevant offers during the conversation.

Automatic Reminders
Your customers automatically receive a WhatsApp reminder before their appointment — you decide how far ahead (days or hours).

Human Handoff
When a conversation needs a personal touch, you or your staff take over from the app and reply yourselves — the AI steps aside.

Multi-language Support
Turkish, English, Arabic, and German. The bot replies in whichever language the customer uses.

Mobile Admin App
Manage conversations, appointments and staff from the Assistly mobile app, with instant notifications — wherever you are.

Plans

Starter
Everything you need to get going.

- Up to 400 appointments / month
- 1 staff member / resource
- 24/7 WhatsApp auto-reply
- Automatic appointment booking
- Mobile app
